Forecast for Thursday 22 Dec 2022

Weather: A few clear spells in the east at first but generally cloudy through the early hours with patchy rain increasingly affecting western hills. Then a cloudy day with outbreaks of occasionally light rain. The rain dies out through the late afternoon and evening.

Chance of cloud-free hill tops above 600m: Close to zero through much of the day.

Low cloud and visibility: Periods or persistent cloud above about 300-450m, with patches below. Away from cloud, visibility good falling to several kilometres in rain.

Forecast for Friday 23 Dec 2022

Weather: Remaining cloudy overnight with outbreaks of rain spreading northeast, these becoming more persistent and occasionally heavy by dawn. The rain clears from the southwest from late morning and the cloud breaks with some sunny spells and occasionally heavy showers following.

Maximum wind: Winds back Easterly or southeasterly 10-15mph through the morning before veering southwesterly 20-25mph, with gusts around 40mph over ridges and summits, from late morning.

Chance of cloud-free hill tops 600m: Little chance until late morning then improving to 60% from southwest.

Low cloud and visibility: Periods or persistent above about 300-450m, with patches below, becoming more occasional above 450-600, from the southwest from late morning. Away from cloud visibility good or very good falling to a few kilometres in heavier rain.

Temperature: **Valleys:** Around plus 5 or 6 Celsius at dawn rising to plus 10 or 11 Celsius by day
At 600m: Around plus 6 or 7 Celsius
Freezing level: Above the summits.
